

RESOLUTION 2018-15

Development Regulation

WHEREAS, the culinary water supply of Mendon City, as detailed in the Utah Division of Drinking Water's Water System Capacity Calculation Sheet, is near capacity in a worst-case scenario; and,

WHEREAS, Mendon City holds a responsibility to provide adequate resources to those who are currently serviced by the culinary system and maintain required fire flow standards; and,

WHEREAS, Mendon City is currently pursuing additional, viable water sources; and,

WHEREAS, until such time that sufficient amounts of viable water are developed, bringing the resource into the current water system, limiting development is necessary to safeguard the current culinary water resources as per Utah Statute 10-9a-504; and,

WHEREAS, Mendon City Council and Planning Commission are working on long-term and short-term plans for appropriate growth; and,

WHEREAS, Mendon City Council finds this resolution in the best interest of Mendon City and its citizens,

NOW, THEREFORE, Mendon City Council will allow up to fifteen (15) culinary water hookups which may include one (1) minor subdivision between the dates of October 11th, 2018 and December 31st, 2019. Compelling, countervailing public interest demands suspend all major subdivisions until such time that Mendon City Council finds that the culinary water system can support a major subdivision.

EFFECTIVE DATE shall take effect immediately upon copies being posted in three public places within the city of Mendon, Utah as provided by law.

ADOPTED AND PASSED by Mendon City Council this 8th day of November 2018.
